--- [Router Log]: Routing to TECHNICAL expert ---
To help you debug the `IndexError` on line 5 of your Python script, I would need to see the actual code. However, I can provide you with a general example of how an
`IndexError` might occur and how to fix it.

### Example Code
```python
# example.py
def main():
    my_list = [1, 2, 3]
    print(my_list[5])  # IndexError: list index out of range

if __name__ == "__main__":
    main()
```
In this example, the `IndexError` occurs because `my_list` only has three elements (at indices 0, 1, and 2), and we're trying to access the element at index 5, which
 doesn't exist.

Debugging Steps
1. **Check the line number**: Make sure the error is indeed occurring on line 5.
2. **Verify the data structure**: Check the type and contents of the data structure (e.g., list, tuple, string) you're trying to access.
3. **Index bounds checking**: Ensure that the index you're trying to access is within the valid range for the data structure.

Fixed Example
```python
# example.py
def main():
    my_list = [1, 2, 3]
    index = 5
    if index < len(my_list):
        print(my_list[index])
    else:
        print(f"Index {index} out of range for list of length {len(my_list)}")
```
```
if __name__ == "__main__":
    main()
```
In this fixed example, we added a check to ensure that the index is within the valid range for the list before trying to access it.

To provide a more specific solution, please provide the actual code that's throwing the `IndexError` on line 5, and I'll be happy to assist you further.

h your account?

Once I have this information, I'll be able to check on the duplicate charge and work on processing a refund for the incorrect payment. If the refund is approved, you
 can expect to see the credited amount back in your account within 3-5 business days, depending on your bank's processing time.

In the meantime, I want to assure you that we take situations like this very seriously and are taking steps to prevent it from happening again in the future. Your sa
tisfaction and financial security are our top priority, and I appreciate your patience and cooperation as we work to resolve this issue.

If you have any questions or concerns, please don't hesitate to reach out to me directly. I'm here to help and want to ensure that you're completely satisfied with t
he outcome.
